

Bunny Veggies & Greens

Proper Diet:

- 80-90% Hay; timothy hay, orchard grass, oat hay (a pile the size of the rabbit, per rabbit, per day, Alfalfa hay should only be for young/ baby/ growing or underweight rabbits)
- 5% pellets; 1 eggcup of pellets (1 tbs per 2 pounds of body weight, the type that all looks the same, not muesli-style mix)
- 10% Veggies & Greens (1 packed cup greens and 1 tbs of vegetables per 2 pounds of body weight; 3:1 ratio greens to veggies)
- 5% Fruit or flowers (1 tsp per 2 pounds of body weight)

You should only feed fruits once or twice a week in small amounts. NO SEEDS OR PITS! Sugary fruits, such as bananas and grapes should be fed only as occasional treats, and NO fruit should be fed to an overweight rabbit.

A small amount of oats are fine as an occasional treat, or if recommended by your rabbit veterinarian for underweight rabbits.
